Dedicated and experienced SOFTWARE ENGINEER with a robust background in web development using Angular, Laravel, Node and React JS and along with proficiency in FULLSTACK WEB DEVELOPER. Seeking to leverage my skills and expertise to contribute to a dynamic software development team.

CAREER ABRIDGEMENT

A value driven and highly accomplished professional offering overall **1 year 2 months** of experience **in Full stack Web Development** using **Angular**, **Laravel**, **Node** and **React JS**.

PROFESSISONAL SUMMARY

- Proficient in leading web development technologies, including Angular, Laravel, Node, and React JS.
- Demonstrated skills as a **FULLSTACK WEB DEVELOPER**, showcasing proficiency in both front-end and back-end development.
- Established success in **delivering high-quality** software solutions within specified timelines.
- Expert in collaborating with cross-functional teams to analyze **requirements, design, and implement** innovative solutions.
- Collaborated in designing **user interfaces**, **implementing features**, and **optimizing server-side** functionalities
- Proficient in embedding **Power BI reports with React Web app.**
- Proficient in building dashboards using **data integration**, **modeling**, and **data visualization** techniques
- Implying a proactive role in **addressing challenges** and introducing **creative solution.**
- Eager to leverage skills and experience to contribute to a dynamic **software development team**, aiming to achieve excellence in web application development.

ABOUT MY ROLE

- Contributed to the development of **interactive and user-friendly web pages** with seamless cross-functionality.
- Involved in end-to-end development processes, suggesting responsibilities both on the **front-end** (Angular, React JS) and the **back-end** (Laravel, Node)
- Designing, coding a new website for the project using **HTML, CSS, JavaScript, Laravel**.
- Developed code for processing a **large amount of data** from documents to Postgres
- Designed and implemented separate modules for Department, Location, and Brand categories, incorporating **Create, Read, Update, and Delete** (CRUD) operations
- Developed **custom reports** within the web application to meet specific customer requirements.
- Employed reporting tools or frameworks to generate meaningful insights from the stored data
- Integrated email functionality by using **SMTP server**, enabling effective communication with users**.**

Technical:

Front-end Development	Angular, React JS and Ionic
Back-end Development	Laravel, Node JS, Spring Boot
Language	Java
Integrated Development Environment (IDE)	Visual studio code and Eclipse
Reporting Tool	Zoho Project Management
Database Management	MySQL and Postgres
Version Control	GitHub and Bit Bucket

CERTIFICATIONS

successfully completed a comprehensive 6-month Full Stack Development Course at Edubridge learning institute. The course covered a wide range of topics, including Angular, Spring Boot, Java, JDBC, Hibernate and MySQL

SCHOLASTIC CREDENTIALS

Degree / Certificate	University / Board	College / School	CGPA	Year
B.E Mechanical Engineering	Anna University	NEHRU Institute of Engineering and Technology	7.01	2015– 2019

Current Employer: **QR Solutions Private Limited /** Duration – October 2022 to Present

Role: Full stack Web Developer

Project Overview:

Project Title: AppRetail (Simplified Lead Management for Auto Dealerships)

Project Description: AppRetail is a complete lead management solution for auto dealerships that streamlines operations, cuts down on data collecting time, tracks the sales process, offers customer insights, allows for seamless communication, and boosts productivity. A user-friendly interface and easy connectivity are provided by appRetail.io. AppRetail is a useful tool for automotive firms thanks to its integrated capabilities for sales, marketing automation, after-sales support, and service
. **Framework:** Front-End: Angular and React js, Back-End: Laravel.

Project Title: KIA WARRANTY
Project Description: The project's goal is to create a thorough Warranty Management Audit System for KIA cars. This system will make it possible to manage warranty claims, track down vehicle parts, find significant and minor problems, and handle recall campaigns in an efficient manner
Framework: Front-End: React Js, Back-End: Node Js

PERSONAL PROJECT

Project Title:2ktribes.com
Project Description: A platform committed to ethical and sustainable practices, offering T-shirts made from eco-friendly materials and produced under fair labor conditions. Targets environmentally conscious consumers seeking stylish, responsibly sourced apparel
Framework: React Js
